

Greetings,

Welcome to the Red Tail Wellness Center. Our goal is to let your health soar.

Our clinic is designed for one purpose, to help you attain your goals in health and wellness. Having experienced the chiropractic and wellness profession personally, we have seen drastic differences between patient focused doctors and doctors who focus on getting patients. This facility is not about pre-determined treatment plans that focus on bottom lines; rather it is focused on the patient for the concerns they bring.

From low back pain to allergies, chiropractic has been shown to be equal, or superior to traditional health models, while providing results in a non-invasive and cost effective manner. While trying to exceed the traditional healthcare model, the Red Tail Wellness Centers understand that many patients have quality, established medical doctor relationships. This center works in tandem with medical doctors, and you will notice in the paper work a section for your medical doctors information. We hope to provide your medical doctor with a report of your visit so that you have a team, not individual doctors working against each other.

Once we began our doctorates, we realized the potential for applied kinesiology, functional medicine and chiropractic to meet and exceed our patient's non-emergency health care needs. As primary health care physicians, we are excellent at attending to an ankle injury or low back complaint, but also strive to help in areas once traditionally thought "non-chiropractic". From chronic infections, thyroid, fatigue, headaches and blood sugar dysfunctions chiropractic, functional medicine and applied kinesiology work to establish balance and harmony.

As your mentor and coach, great things happen with teamwork and hard work. For health and harmony to be restored, we need your cooperation and commitment to meet and exceed your goals.

We are honored you have chosen us to start this process!

Yours Truly in Health and Wellness,

Karen Hollaman, D.C.

Ian Hollaman, D.C.
